

## **Mid Valley Pipeline Spill Update for 10/31/2014**

- There are 197 personnel working the response. As the response moves from response to remediation Sunoco will downsize accordingly. EPA has 1 FOSC, 2 contractors, a boat and a mobile command post on scene.
- Unified Command conducted a site walk of Division A & B, and transferred both divisions from the emergency response phase to the remediation phase.
- Total spill volume released was 4509 bbl.
- Recovered crude oil is 3391 bbl. New recovery estimate reflects calculations from oil entrained in soil and absorbents. Correction to Spill Update for 10/30/2014 due to correction on ICS 209 estimates.
- 2647 bbl. of the recovered crude oil has been transported off-site and recycled at Sunoco's Haynesville Station, in Haynesville, LA. Correction to Spill Update for 10/30/2014 due to correction on ICS 209 estimates.
- Water collected to date is 3832 bbl. with 1628 bbl. shipped offsite, 1925 cubic yards of soil, debris and sorbent have been collected, none of which has been shipped off-site at this point.
- Wildlife rehabilitation efforts continue. So far, 49 animals have been cleaned, 43 animals released and 482 animals have died, of those approx. 2/3 were fish or reptiles.
- Media interest remains low.
